Background: A spring 2000 decision by the International Hydrographic Organization delimited a fifth world ocean from the southern portions of the Atlantic Ocean, Indian Ocean, and Pacific Ocean. The new ocean extends from the coast of Antarctica north to 60 degrees south latitude which coincides with the Antarctic Treaty Limit. The Arctic Ocean remains the smallest of the world’s five oceans (after the Pacific Ocean, Atlantic Ocean, Indian Ocean, and Southern Ocean).

Location: body of water mostly north of the Arctic Circle

Map References. Arctic Region

Area: total: 14.056 million sq km note: includes Baffin Bay, Barents Sea, Beaufort Sea, Chukchi Sea, Eastern Siberian Sea, Greenland Sea, Hudson Bay, Hudson Strait, Kara Sea, Laptev Sea, Northwest Passage, and other tributary water bodies

Climate: polar climate characterized by persistent cold and relatively narrow annual temperature ranges; winters characterized by continuous darkness, cold and stable weather conditions, and clear skies; summers characterized by continuous daylight, damp and foggy weather, and weak cyclones with rain or snow

Terrain: central surface covered by a perennial drifting polar icepack that averages about 3 meters in thickness, although pressure ridges may be three times that size; clockwise drift pattern in the Beaufort Gyral Stream, but nearly straight-line movement from the New Siberian Islands (Russia) to Denmark Strait (between Greenland and Iceland); the icepack is surrounded by open seas during the summer, but more than doubles in size during the winter and extends to the encircling landmasses; the ocean floor is about 50% continental shelf (highest percentage of any ocean) with the remainder a central basin interrupted by three submarine ridges (Alpha Cordillera, Nansen Cordillera, and Lomonosov Ridge)

Natural Resources: sand and gravel aggregates, placer deposits, polymetallic nodules, oil and gas fields, fish, marine mammals (seals and whales)

Economy: Economic activity is limited to the exploitation of natural resources, including petroleum, natural gas, fish, and seals

Ports and Harbors: Churchill (Canada), Murmansk (Russia), Prudhoe Bay (US).

Note: sparse network of air, ocean, river, and land routes; the Northwest Passage (North America) and Northern Sea Route (Eurasia) are important seasonal waterways

Whether Iqaluit is your final destination or the gateway to your own Arctic adventure, discover for yourself why DISCOVERY LODGE HOTEL is the first choice of experienced northern travellers.

The DISCOVERY LODGE HOTEL is recognized for its excellence in service, comfort and hospitality. Attention to detail by our professional, friendly and attentive staff is what sets us apart.

We offer courtesy vehicles that meet you at the airport, renowned licensed dining, comfortable rooms with full amenities, an Executive Suite, and bright, spacious conference and banquet facilities. Internet access, voice mail, facsimile and copier, as well as laundry and room service, are available.

DISCOVERY LODGE HOTEL, listed in the Where to Eat in Canada restaurant guide, is devoted to excellence.
