Economy: Agriculture still provides a livelihood for more than 80% of the population but supplies only about 50% of food needs and accounts for only 3% of GDP. Subsistence farming and cattle raising predominate. The sector is plagued by erratic rainfall and poor soils. Diamond mining and tourism also are important to the economy. Substantial mineral deposits were found in the 1970s and the mining sector grew from 25% of GDP in 1980 to 38% in 1998. Unemployment officially is 21% but unofficial estimates place it closer to 40%. The Orapa 2000 project, which will double the capacity of the country's main diamond mine, will be finished in early 2000. This will be the main force behind continued economic expansion.
