Background: (British Isles), group of small islands, dependencies of the British Crown, in the English Channel, off the coast of Normandy, France. The islands are governed by representatives of the British monarch, and each has a constitution and elected government. Since the 16th century, Sark has been ruled as a fiefdom of a hereditary seigneur or dame. The islands control their own taxes.

Jerseys are dairy cattle, varying in colour from light grey to very dark fawn. Horticulture and floriculture are successfully pursued, especially in Guernsey, and granite is quarried. During World War II, German troops occupied the islands from June 1940 until May 1945, and Elizabeth Castle, an Elizabethan fortress on Jersey that is now a military museum, has an exhibition concerned with this period.
