Capital: Newport, Isle of Wight

Background: -Around 1900 BC the Beaker people arrived – so called from their distinctive pottery. They called the Island *Wihth* (weight) meaning raised or what rises over the sea. Then the Romans arrived in 43 AD and translated *Wihth* into the name *Vectis* from the Latin *vehō* meaning lifting. At the outset of the Civil War in 1642, the Parliament assumed control of the Island and retained their control throughout the conflict. In spite of this, King Charles I went to the Island on escaping from imprisonment at Hampton Court in November 1647. As a prisoner at Carisbrooke Castle, the King made several unsuccessful attempts to escape before being transferred to Newport in September 1648, where abortive negotiations with parliament (known as the Treaty of Newport) took place. In November, the King was seized by the Army and taken to the Hurst Castle and then to his trial and execution in London. In the 19th century the Island was transformed by the coming of the railways. Queen Victoria took advantage of the island's new accessibility by using Osborne as her retreat. Affairs of the state soon followed her and the modesty furnished family home had to be enhanced with apartments where she could receive foreign heads of state. However, her children enjoyed many hours and a great deal of freedom at Osborne as a visit to Swiss Cottage will indicate. Queen Victoria's affection for Osborne added to the Island's attractions of climate and scenery, and Ryde, Sandown, Shanklin & Ventnor expanded from fishing villages to fashionable resorts.

Location: Isle of Wight is an English Island and county in the English Channel three miles from the south coast of England. It is situated south of the county of Hampshire and is separated from mainland England by the Solent.
