Background: Italy became a nation-state belatedly - in 1861 when the city-states of the peninsula and Sicily were united under King Victor EMMANUEL. The Fascist dictatorship of Benito MUSSOLINI that took over after World War I led to a disastrous alliance with Nazi Germany and Italian defeat in World War II. Revival followed. Italy was a charter member of NATO and the European Economic Community (EEC) and joined the growing political and economic unification of Western Europe, including the introduction of the euro in 1999. Persistent problems include illegal immigration, the ravages of organized crime, corruption, high unemployment, and the low incomes and technical standards of southern Italy compared with the more prosperous north.

Location: Southern Europe, a peninsula extending into the central Mediterranean Sea, northeast of Tunisia

Map References: Europe

Area: total: 301,230 sq km land: 294,020 sq km water: 7,210 sq km note: includes Sardinia and Sicily

Climate: predominantly Mediterranean; Alpine in far north; hot, dry in south

Terrain: mostly rugged and mountainous; some plains, coastal lowlands

Natural Resources: mercury, potash, marble, sulfur, dwindling natural gas and crude oil reserves, fish, coal, arable land

Population: 57,634,327 (July 2000 est.)

Nationality: noun: Italian(s) adjective: Italian

Ethnic Groups: Italian (includes small clusters of German-, French-, and Slovene-Italians in the north and Albanian-Italians and Greek-Italians in the south)

Religions: predominately Roman Catholic with mature Protestant and Jewish communities and a growing Muslim immigrant community

Economy: Italy has a diversified industrial economy with approximately the same total and per capita output as France and the UK. This capitalistic economy remains divided into a developed industrial north, dominated by private companies, and a less developed agricultural south, with more than 20% unemployment. Most raw materials needed by industry and more than 75% of energy requirements are imported. For several years Italy has adopted budgets compliant with the requirements of the European Monetary Union (EMU); representatives of government, labor, and employers also agreed to an update of the 1993 "social pact," which has been widely credited with having brought Italy's inflation into conformity with EMU requirements. Italy must work to stimulate employment, promote wage flexibility, hold down the growth in pensions, and tackle the informal economy. Growth was 1.3% in 1999 and should edge up to 2.6% in 2000, led by investment and exports.

Industries: tourism, machinery, iron and steel, chemicals, food processing, textiles, motor vehicles, clothing, footwear, ceramics

Currency: 1 Euro(€) = 100 cents.

Railways: total: 19,394 km standard gauge: 18,071 km 1.435-m gauge; Italian Railways (FS) operates 6,014 km of the total standard gauge routes (11,322 km electrified) narrow gauge: 112 km 1.000-m gauge (112 km electrified); 1,211 km 0.950-m gauge (153 km electrified) (1998)

Highways: total: 654,676 km paved: 654,676 km (including 6,957 km of expressways) unpaved: 0 km (1998 est.)

Waterways: 2,400 km for various types of commercial traffic, although of limited overall value
