Capital: Boston **Time:** GMT - 5

Background: Massachusetts entered the Union on February 6, 1788, as the sixth of the 13 original states. It soon became an important intellectual centre, known for Harvard University and the cultural institutions of Boston. In the 19th century, it developed into a major manufacturing state, noted for textiles and footwear; in the mid-20th century, electronic components and other high-technology items became leading manufactured products. Massachusetts is famous for its summer resorts, such as the sand beaches of Cape Cod. Presidents John Adams, John Quincy Adams, and John F. Kennedy were born in the state, and President Calvin Coolidge spent most of his life here. The name of the state is probably derived from an Algonquian village and may mean "place of big hills". Massachusetts is known as the "Bay State". Its major cities are Boston (the capital), Worcester, Springfield, Lowell, New Bedford, and Cambridge.

Population: According to the 1990 census, Massachusetts had 6,016,425 inhabitants, an increase of 4.9 per cent over 1980. The population estimate for 1997 was 6,117,520, showing a reversion to the trend of slow population growth established in the 1970s. The average population density in 1990 was 296 people per sq km (768 per sq mi); higher population concentrations were found in the eastern third of the state, where most of the people lived. Whites made up 89.8 per cent of the population (down from 93.5 per cent in 1980) and blacks 5 per cent; additional groups included 53,792 people of Chinese ancestry, 19,719 Asian Indians, 15,449 people of Vietnamese background, 14,050 people of Cambodian origin, 11,857 Native Americans, and 11,744 people of Korean descent. More than 287,000 Massachusetts residents claimed Latino ancestry, double the number in 1980.

Location: Massachusetts, officially Commonwealth of Massachusetts, one of the New England states of the United States, bordered on the north by Vermont and New Hampshire; on the east by the Atlantic Ocean and several of its arms (such as the Gulf of Maine, Massachusetts Bay, Boston Bay, and Cape Cod Bay); on the south-east by the Atlantic Ocean and a number of its arms (such as Nantucket Sound and Buzzards Bay); on the south by Rhode Island and Connecticut; and on the west by New York.

Area: Massachusetts has an area of 23,934 sq km (9,241 sq mi), 44th in size among the states; about 1.6 per cent of its land area is owned by the federal government. The state is roughly rectangular in shape, and its extreme dimensions are 295 km (183 mi) from east to west and 182 km (113 mi) from north to south. Elevations range from sea level, along the Atlantic Ocean, to 1,064 m (3,491 ft), from the top of Mount Greylock, in the north-west. The approximate mean elevation is 152 m (500 ft). The state has a coastline of 309 km (192 mi) and a tidal shoreline of 2,445 km (1,519 mi).

Industries: The limited mineral resources of Massachusetts include coal and building materials such as granite and marble, basalt, sand and gravel, clay, peat, and lime. The most valuable agricultural crops are greenhouse and nursery products, cranberries, hay, apples, tobacco, potatoes, and other vegetables. Principal livestock products are dairy items, eggs, beef cattle, pigs, turkeys, and sheep.

Fishing is of considerable importance. In the late 1980s the annual fish catch was valued at \$273 million, the second highest (after Alaska) in the United States. Principal species of fish landed are cod, flounder, haddock, hake, pollack, swordfish, tuna, scallops, clams, shrimp, and lobster.

Massachusetts is one of the leading US states in manufacturing. The principal products are industrial machinery such as textile-, shoe-, and paper-making machinery, office equipment, and engines; electronic equipment, especially high-technology electronic components; and precision instruments, notably scientific measuring

devices. Other major manufactured products include textiles, clothing, metal, paper and paper products, processed food, footwear, and printed materials.
