Capital: Bucharest **Time:** GMT + 2 (summer time GMT + 3)

Background: Soviet occupation following World War II led to the formation of a communist Peoples Republic in 1947 and the abdication of the king. The decades-long rule of President Nicolae CEAUSESCU became increasingly draconian through the 1980s. He was overthrown and executed in late 1989. Former communists dominated the government until 1996 when they were swept from power. Much economic restructuring remains to be carried out before Romania can achieve its hope of joining the EU.

Economy: After the collapse of the Soviet Bloc in 1989-91, Romania was left with an obsolete industrial base and a pattern of industrial capacity wholly unsuited to its needs. In February 1997, Romania embarked on a comprehensive macroeconomic stabilization and structural reform program, but reform subsequently has been a frustrating stop-and-go process. Restructuring programs include liquidating large energy-intensive industries and major agricultural and financial sector reforms. In 1999 Romania's economy contracted for a third straight year - by an estimated 4.8%. Romania reached an agreement with the IMF in August for a \$547 million loan, but release of the second tranche was postponed in October because of unresolved private sector lending requirements and differences over budgetary spending. Bucharest avoided defaulting on mid-year lump-sum debt payments, but had to significantly draw down reserves to do so; reserves rebounded to an estimated \$1.5 billion by yearend 1999. The government's priorities include: obtaining renewed IMF lending, tightening fiscal policy, accelerating privatization, and restructuring unprofitable firms. Romania was invited by the EU in December 1999 to begin accession negotiations.
