Capital: Bern **Time:** GMT + 1

Background: Switzerland's independence and neutrality have long been honored by the major European powers and Switzerland was not involved in either of the two World Wars. The political and economic integration of Europe over the past half century, as well as Switzerland's role in many UN and international organizations, may be rendering obsolete the country's concern for neutrality.

Location: Central Europe, east of France, north of Italy

Economy: Switzerland, a prosperous and stable modern market economy with a per capita GDP 20% above that of the big western European economies, experienced slower growth in 1999, because of weak foreign and domestic demand. Growth, however, is expected to rebound to over 2% in 2000. The Swiss in recent years have brought their economic practices largely into conformity with the EU's to enhance their international competitiveness. Although the Swiss are not pursuing EU membership in the near term, in 1999 Bern and Brussels signed agreements to further liberalize trade ties. These agreements still have to pass a Swiss referendum in spring 2000, however. Switzerland is still considered a safe haven for investors, because it has maintained a degree of bank secrecy and has kept up the franc's long-term external value.
